Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.In Culture of Terror Eugene Narrett accomplishes a remarkable task: defining and identifying the roots of postmodernism in the scientific utopianism of the Enlightenment. Dr. Narrett explains and traces the increasing totalitarian core of this drive to control and perfect human beings to the media distraction machine. Using core texts from political philosophy and literature, he follows the Romantic revolution in values and scientific utopianism, through Modernism and its suicidal, relativistic, power mad postscript, postmodernism. Using a broad palette of great writings from many disciplines he traces America's regression to nihilistic paganism directed by an oligarchy and a new, hi-tech feudalism that impoverishes and de-humanizes. In America, the flower of the West, the contradictions and self-negation in this process are most pronounced and grotesque as shown by popular culture which he examines extensively. Culture of Terror is a unique tale of imperial identity theft playing out its logic in confessions of regret, expressive introspection (psychology) and the exhibitionism of media spectacles that absorb and program everything in the disintegrating language of its distraction machine.
