Excerpt: .is that the entire medical for a given year of issue in a particular state be compared with the total number of compensable accidents, after modifying this number for the difference between the waiting period in the actual experience and the conditions to which the experience is converted. In this way, we will get a figure which might be referred to as the cost per compensable case.⁵ A comparison of this value as found for the data to be converted with the same value for the latest policy year or basic level will give a ratio which might be applied to the actual medical in the experience to convert it to the basic level. In appendix A to this paper is given an exhibit sheet which has been worked out to present the combined experience of a classification converted by the method outlined above and...
