

Kennedy Center: Improvements Needed to Strengthen the Management and Oversight of the Construction Process: Gao-03-823

By -

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. In the mid-1990s, John F. Kennedy Center for the Performing Arts (Kennedy Center) officials recognized a need for additional parking and better site access. As a precursor to a planned project to construct an 8-acre plaza and two additional buildings at the site, the Kennedy Center is currently in the process of constructing a garage expansion and site improvement project. GAO did this study because of congressional concerns over project delays and costs as well as challenges that the Kennedy Center faces as it pursues this major construction effort. GAO's objectives were to (1) compare the garage expansion and site improvement projects current costs, time frames, and scope with the estimates provided to congressional stakeholders in 1997 and 1998 and (2) identify what challenges the Kennedy Center faces in managing large construction projects. This item ships from La Vergne, TN. Paperback.
